EL DORADO COUNTY TRANSIT AUTHORITY

FINAL

CAPITAL IMPROVEMENT PLAN

FISCAL YEAR 2025/2026

EL DORADO COUNTY TRANSIT AUTHORITY

CAPITAL IMPROVEMENT PLAN

The El Dorado County Transit Authority (El Dorado Transit) maintains a fleet of large, medium, and small buses, minivans, and sedans. Fleet vehicles are utilized in the delivery of public transportation; for administrative support travel; staff development training; on-going public outreach travel and maintenance of transit facilities such as bus stops and park-and-ride lots. The Capital Improvement Plan is designed to address the financial investment required to maintain the fleet and facilities owned or leased by El Dorado Transit. Continuing the current level of service and managing the potential expansion of service will succeed only if adequate consideration is given to capital needs.

The Capital Improvement Plan is a planning document setting goals with realistic revenue projections. Vehicle replacement is a component of the Capital Improvement Plan. This annual planning process maximizes available funding for capital investments necessary to provide public transportation at the current level of service and efficient management of the expansion of public services.

As a fiscal management tool, the Capital Improvement Plan is prepared to take full advantage of capital funding programs, avoid large annual claims against local transportation funds for capital expenditures and to assure capital reserves are available in case annual capital revenue sources diminish or are not consistent. Capital Improvement Plan funding is available for full replacement cost and provides local match funding required for capital grant programs.

California public transit operators have several sources of capital funding available. Each funding source has differing criteria for eligible projects. Bus replacement funding is the most challenging capital funding for public transit operators.

The Capital Improvement Plan and Capital Budget for 2025/26 identify transit capital funded with Transportation Development Act (TDA) funds, State of Good Repair (SGR) funds, Federal Transit Administration (FTA) Section 5307 funds, Federal Transit Administration (FTA) Section 5310 funds, and a proposed Low Carbon Transit Operations Program (LCTOP) grant from the State.

The Capital Improvement Plan includes a summary of projects and funding sources, the budget and project descriptions.

Maintenance Facility Swamp Cooler and Steam Cleaner Modifications

Project No. 20-04 (3)

In 2001, two (2) industrial swamp coolers were installed on the exterior of the maintenance facility to provide environmental control for maintenance staff performing maintenance in the three (3) bays. Over time, these large units are inefficient and do not provide the necessary cooling needed for personnel and require extensive maintenance.

This project would remove the existing units, patch the metal siding, install new racking and two (2) more efficient swap coolers and proper ducting inside the bays.

In 2013, an engine steam cleaning system was constructed behind the maintenance facility for keeping the bus engines free of excessive oil and grease as required by California Highway Patrol Transit Operator Compliance requirement. The facility included a steel carport area with a contained drain system to prevent leakage into the storm water drain system. When not used for steam cleaning engines, the custodian uses this area to perform bus cleaning. Because the area has no siding it is not a conducive environment during adverse weather. It is not a large enough area to house a 45-foot bus.

This project would install pre-engineered metal siding to close off three (3) sides of the facility, install additional columns to extend the length of the facility by 10 – 15 and a rollup door to fit the larger buses to enable closing off the work area during adverse weather conditions.

COST SUMMARY (ESTIMATE)

	<u>Adopted Budget</u>	
Shop Swamp Cooler Modifications	\$63,500	<i>Please Note: The Shop Swamp Cooler Modifications have been completed and expensed at \$30,948.00</i>
Contingency	<u>\$ 6,825</u>	
	\$70,325	
Steam Cleaner Modifications	\$90,000	
Contingency	<u>\$ 8,850</u>	
	\$98,350

El Dorado Hills Park and Ride Improvements

Project No. 22-02 (3)

The El Dorado County Transit Authority (El Dorado Transit) maintains a park and ride facility in El Dorado Hills at Post Street and White Rock Road. In the El Dorado Transit Park and Ride Master Plan which was adopted by the El Dorado Transit Board on February 1, 2024, improvements to the El Dorado Hills Park and Ride were recommended. Those improvements include repaving the existing lot; reconstructing the transit passenger plaza; renewing landscaping, striping, and signing; adding new EV charging stations; improving bicycle and pedestrian connections; and purchasing and improving the lot to the east of the current facility.

COST SUMMARY (ESTIMATE)

Adopted Budget

Park and Ride Parking Lot Resurfacing	<u>\$2,800,000</u>
<i>Total Project Estimate</i>	<i>\$2,800,000</i>

Zero Emission Vehicles and Infrastructure – Phase I

Project No. 22-03 (4)

El Dorado Transit (EDT), like all transit agencies in the state of California, are required to transition to zero-emission buses (ZEBs) by 2040. In 2018, the California Air Resources Board (CARB) adopted the Innovative Clean Transit ICT regulation that requires this gradual transition to ameliorate the air quality for all communities across California. While public transportation already replaces car trips, by transitioning away from diesel (which currently powers EDT's fleet) and other fossil fuels, transit agencies will further contribute to the sustainability of our natural environment.

EDT is classified under the ICT regulation as a small agency, meaning that beginning in 2026 through 2028, all new heavy-duty bus purchases must consist of at least 25% ZEBs. By 2029, all new purchases are to be 100% ZEB.

EDT undertook a ZEB study to determine the appropriate technologies for its fleet, whether battery-electric buses (BEBs), that 'fuel' or charge in the bus garage and/or on-route, or hydrogen fuel cell electric buses (FCEBs) that are fueled with hydrogen. BEBs and FCEBs are costly vehicles, nearly one-and-a-half to triple the cost of diesel-powered vehicles. EDT will need to replace its fleet of buses according to the ICT schedule.

Furthermore, the ICT regulation also requires that beginning in 2026, if Altoona-test models are available, agencies must also begin replacing articulated, over-the-road, double-decker, or cutaway buses. EDT currently operates diesel-powered motor coaches on its commuter services, so these buses would need to be transitioned; moreover, gasoline-powered cutaways used for demand-response service will also need to be transitioned to ZE.

Finally, EDT will need to invest heavily in infrastructure for ZEBs, whether BEB or FCEB. For BEBs, electric utility upgrades will need to be coordinated with PG&E, and BEB chargers will need to be procured, installed, and hooked-up prior to BEB acceptance. For FCEBs, EDT may need to construct an on-site fueling yard for hydrogen or look for offsite opportunities, although currently, very few hydrogen fueling stations are available.

Update: While the future of zero-emission mandates are uncertain, El Dorado Transit currently has grant funds (LCTOP) specifically designated toward the Zero Emission Vehicles and Infrastructure project that must be used (according to grant guidelines, "upon receipt of the final year's funding, whether 4 years or less, the agency will have six months to begin the project.") El Dorado Transit leadership has participated in multiple discussions between electric and hydrogen. Although battery-electric buses currently have more options available, the infrastructure and support for hydrogen buses is growing, and could match battery-electric in the near future. Leadership believes it is in El Dorado Transit's best interest to explore both options.

The first phase would be to install the infrastructure and electrical charging equipment using the current grant funds then focus future grant funds on exploring hydrogen.

COST SUMMARY (ESTIMATE)

Bass Lake Hills Park and Ride – Phase I

Project No. 22-04 (5)

All work related to the completion of the Bass Lake Hills Park and Ride, during or after preliminary construction of the facility.

The El Dorado County Transit Authority Park-and-Ride Facilities Master Plan (2017) identified the Bass Lake Hills Park and Ride location as the #3 Priority Site for development. The assumption was that the land for the facility would come from development activity within the Bass Lake Hill Specific Plan. In 2018, through Irrevocable Offers of Dedication provided by a developer, El Dorado Transit took title to portions of two parcels on the southwest side of Bass Lake Road at the future Country Club Drive, totaling 2.4 acres. Rough grading of the site, as part of the reconstruction of Bass Lake Road at the Country Club Drive intersection, was completed in 2020. The Condition of Approval for the Bass Lake North subdivision requires the developer to construct the first half (100 spaces) of the park and ride facility. That construction will create the basic park and ride facility, which includes drainage, finish grading and paving. Construction is now scheduled to begin in May 2023.

Additional improvements that will be needed to complete the first phase of the facility construction include signage, landscape design and installation, water supply, electric utilities, and lighting. Due to recently added design requirements and an accelerated construction schedule, staff expects to incur costs associated with the completion of Phase 1 construction within FY 2023/24. This shorter timeframe necessitates the use of local Transportation Development Act (TDA) funds for this project.

As of March 2025, delays to the project were encountered due to the landscaping plan approval process. The remaining items include actual landscaping, installation and materials for a water tank and electrical building. Delays in additional work needed require an adjustment to the overall budget.

Proposal opening was conducted on April 21, 2025. Estimates requiring additional funding for successful completion of Phase I for the Bass Lake Park & Ride.

COST SUMMARY (ESTIMATE)

	<u>Adopted Budget</u>
Bass Lake Park & Ride	\$ 720,000
Contingency	<u>\$ 80,000</u>
<i>Total Project Estimate</i>	<i>\$ 800,000</i>

FUNDING SOURCE

Transportation Development Act (TDA)	<u>\$ 800,000</u>

Bus Parking Lot Rehabilitation

Project No. 23-02 (4)

The El Dorado County Transit Authority (El Dorado Transit) parks all vehicle assets on site at our facility located on the northeastern portion of the property. The parking area has interior and perimeter lighting, chain link fencing, a paved surface and mechanical entry gate.

The pavement condition is degraded significantly and needs repair. In addition, bus charging infrastructure and parking lot layout improvements were recommended in the Zero Emission Vehicle Rollout and Implementation Plan. Including “Area A” in the ZEB study.

This project will include the removal and replacement of asphalt, moving concrete curbs, installation of underground conduit, new striping, and other improvements.

COST SUMMARY (ESTIMATE)

	<u>Adopted Budget</u>	<u>Proposed Budget</u>
Bus Parking Lot Rehabilitation Consulting Work	\$ 0	\$ 112,500
Bus Parking Lot Rehabilitation	\$810,000	\$1,180,700

Security Surveillance & Lighting

Project No. 24-02 (2)

The current surveillance equipment at the El Dorado Transit Main Office, including the Maintenance Building and bus yard, primary bus stops, transfer points, and park & ride facilities occurred between 2011 and 2016. This project will replace current hardware and software to significantly enhance safety and security for transit passengers and property. The project proposes a reinstallation of security cameras and/or lighting including the following locations, Main Office, Central Park and Ride, Placerville Station, Cambridge Road Park and Ride, El Dorado Hills Park and Ride, Ponderosa Road, Bass Lake Road Park and Ride, and Ray Lawyer Drive Park and Ride. Additional locations may be included depending on funding availability.

COST SUMMARY (ESTIMATE)

Collision Avoidance System Upgrade

Project No. 24-04

Operators engage in numerous hours of training throughout their employment on proper mirror usage and blind spot awareness to minimize the likelihood of being involved in collisions with vehicles, bicyclists, and pedestrians. To further reduce the likelihood of collisions in the operator's blind spot, in 2018, Collision Avoidance Systems were installed in the passenger vehicles to assist operators by alerting them of potential collisions.

Since the original installation, Collision Avoidance System technology has vastly improved. Upgrading the systems with the updated technology will decrease visual obstructions used by the current components, provide additional detection by increasing sensor technology during low light, and provide an exterior audible announcement warning pedestrians and bicyclists who enter the danger zone of a vehicle when turning.

COST SUMMARY (ESTIMATE)

Adopted Budget

Collision Avoidance System	\$325,500
Contingency 10%	<u>\$ 32,550</u>

Cambridge Road Park and Ride Improvements

Project No. 25-03

The El Dorado County Transit Authority (El Dorado Transit) maintains a park and ride facility at Cambridge Road and Highway 50 in Cameron Park. In the El Dorado Transit Park and Ride Master Plan which was adopted by the El Dorado Transit Board on February 1, 2024, improvements to the park and ride were recommended. Those improvements will make the facility a fully adequate transit center and would include adding a bus loop with two additional bus loading bays; parking lot resurfacing and striping; and landscaping improvements.

COST SUMMARY (ESTIMATE)

Placerville Station Upgrades

Project No. 25-04

The Placerville Station Transfer Center is a key hub for El Dorado Transit routes. Three local routes (20, 50X & 60) utilize Placerville Station as well as the Sacramento/South Lake Tahoe Connecting Bus. For passengers traveling to Tahoe with Capitol Corridor and Amtrak, Placerville Station might be their only impression of the city of Placerville.

The restrooms at Placerville Station experience heavy usage from not only Transit riders, but also from locals, including transients and users of the nearby El Dorado Trail. This, in conjunction with a worn and older building, has left Placerville Station in poor shape.

The city of Placerville is planning maintenance improvements which consist of:

- Replacing roof
- Power washing facility
- Drywall repair
- Exterior painting
- New restroom amenities

El Dorado Transit is a constant user of the Placerville Station and partners with the city of Placerville in the utilization of the facility. As such, the city has asked El Dorado Transit to share 50% of the maintenance improvement costs estimated at \$100,000.

COST SUMMARY (ESTIMATE)

Adopted Budget

Placerville Station Improvements	\$50,000
Contingency 10%	<u>\$ 5,000</u>

Administration / Maintenance Facility Equipment

Project No. 26-01

El Dorado Transit may have the need during the Fiscal Year 2025/26 to procure items considered incidental in nature but are above the \$1,000 threshold that designates an asset posted to the depreciation schedule. Examples of this would include the replacement of small office equipment/furniture and/or replacement of Maintenance equipment.

Adoption of the project and budget allows transit staff to procure small items in a timely manner with the least amount of inconvenience to the public and staff. Individual purchase orders for this project will be presented to the Board for approval if they exceed the \$25,000 per purchase limit or if a budget increase is requested.
